

AddisonRyne.github.io — multi-page starter

Below is a complete, minimal site you can drop into your `AddisonRyne.github.io` repo. It has:

- **Home page** with hero, About Me, and **clickable boxes** that link to subpages
- Subpages: **CV, Research, Projects, Contact**
- Shared header/footer, responsive layout, and simple dark theme
- Ready for a future **Blog** (optional)

Personalize: replace all placeholder text (name, bio, links) and drop your `cv.pdf` in the repo root.

script.js (small enhancements)

```

// Mobile menu toggle
const btn = document.getElementById('menuBtn');
const nav = document.getElementById('nav');
btn?.addEventListener('click', () => {
  const open = nav.classList.toggle('open');
  btn.setAttribute('aria-expanded', open ? 'true' : 'false');
});
// Current year in footer
document.getElementById('year').textContent = new Date().getFullYear();

```

404.html (optional custom not-found page)

```
<!doctype html>
<html lang="en">
<head>
  <meta charset="utf-8" />
  <meta name="viewport" content="width=device-width,initial-scale=1" />
  <title>Not Found · Addison Ryne</title>
  <link rel="stylesheet" href="/styles.css" />
</head>
<body>
  <main class="section narrow">
    <h1>Page not found</h1>
    <p>Oops – that URL doesn't exist. Head back <a class="link" href="/">home</a>.</p>
  </main>
</body>
</html>
```

How to publish (quick)

1. In your repo, click **Add file** → **Upload files** and upload all the files above (keep the same structure).
Or clone locally and push.
2. Go to **Settings** → **Pages**.
3. **Source:** Deploy from a branch
4. **Branch:** `main` (folder: `/root`)
5. Save; after the build, your site will be live at `https://AddisonRyne.github.io/`.
6. Optional: add a custom domain in **Settings** → **Pages**, then set DNS and enable **Enforce HTTPS**.

Nice future upgrades (optional)

- Add a **Blog** with a `blog/` folder and simple `index.html` list of posts.
- Add Google Scholar/ORCID badges and social links in the footer.
- Use a form handler (Formspree/Getform) for the contact form; replace `action` with your endpoint.
- Add analytics (e.g., Plausible) by dropping their script in `<head>`.
